Siebel Institute of Technology: Focus and History

For over 140 years, the Siebel Institute has attracted an extensive global following. Our alumni span more than 60 countries and graduates are found in nearly every major brewery around the world. Our classes include a mix of participants from breweries of all sizes who hail from here and abroad. This vast and diverse base of participants enhances the learning opportunity of each student by exposing them to differences in culture, equipment, methods and beer styles. In our formal lectures and demonstrations though, we focus their attention on one common theme: beer. Students may come to the institute with the biases of their own particular brewing environment, but they all leave in the simple and honest camaraderie of being a brewer.

We have a saying here at the Institute: "Not only do we teach our students, but we also help them to teach each other."

Siebel continues to focus on one basic theme, as was published by Dr. J. E. Siebel in a Western Brewer ad from 1893. He stated, "The object of the institute is to promote the progress of the industries based on fermentation, which is done by instruction, investigation, analysis and otherwise."

Dr. John Ewald Siebel was born on September 17, 1845, near Wermelskirchen in the district of Dusseldorf, Germany. He studied physics and chemistry and earned his doctorate at the University of Berlin before moving to Chicago in 1866. In 1868, he founded John E. Siebel's Chemical Laboratory and the Zymotechnic Institute, which soon developed into a research station and school for the brewing sciences.

In 1872, the company moved into new facilities on Belden Avenue on the north side of Chicago, and the business name was changed to the Siebel Institute of Technology. During the next two decades, Dr. Siebel conducted extensive brewing research and wrote more than 200 scientific articles and books. He also acted as the editor of a number of technical publications, including the scientific section of The Western Brewer.

In 1882, he started a scientific school for brewers with another progressive brewer, but the partnership was short lived, and Dr. Siebel continued brewing instruction at his laboratory, and expanded the business in the 1890's when two of his sons joined the company.

The company was incorporated in 1901 and conducted brewing courses in both English and German, and by 1907 there were five regular courses: a six-month Brewers' Course, a two-month Post Graduate Course, a three-month Engineers Course, a two-month Maltsters' Course and a two-month Bottlers' Course. In 1910, the school's name, Siebel Institute of Technology, was formally adopted. With the approach of prohibition, the institute diversified and added courses in baking, refrigeration, engineering, milling, carbonated beverages, and other related topics. On December 20, 1919, just twenty-seven days before prohibition became effective, Dr. J. E. Siebel passed away.

With the repeal of prohibition in 1933, the focus of the institute returned to brewing under the leadership of F. P. Siebel Sr., the eldest son of Dr. J. E. Siebel. His sons, Fred and Ray, soon joined the business and worked to expand its scope. The Diploma Course in Brewing Technology was offered and all other non-brewing courses were soon eliminated.

The fourth generation, represented by Ron and Bill Siebel, joined the Institute in the 1960's. In 1974, they helped introduce the concept of shorter courses, two-weeks or less in length, and designed to meet the specific training needs of a changing brewing industry. The longer Diploma Course in Brewing Technology has been maintained to this day, renamed the WBA International Diploma in Brewing Technology program.

Beginning in 2000, a number of changes occurred for the institute. After many years of ownership, the Siebel family sold their name-sake business to Montreal, Canada-based Lallemand, Inc., a company specializing in the development, production, and marketing of yeasts and bacteria.

In 2001, the Siebel Institute of Technology of Chicago, U.S.A., in cooperation with Doemens Academy of Munich, Germany, formed and created the World Brewing Academy (WBA). This strategic alliance was designed to meet the growing demands of the international brewing community and provide a unique international educational experience for students.

On January 31, 2020, the Siebel Institute of Technology moved to its new home at 322 South Green Street in Chicago. The institute incorporated many of the previous locations elements, in an updated “built for the future” environment.
General Information

For information regarding educational offerings or course suggestions, please email John Hannafan, VP/Director of Education, at jhannafan@siebelinstitute.com.

For any other related issues (i.e.: course dates, registrations, financial payments, tuitions and deposits, course availability, cancellation, school visits and student visas) please contact Lupe Zepeda, Office Manager and Registrar, at lzepeda@siebelinstitute.com.

Office Hours:
Monday-Friday
9:00 AM- 5:00 PM Central Standard Time (CST)

Classroom Hours:
Monday-Friday
8:30 AM- 4:30 PM Central Standard Time (CST)

There are 10-minute breaks every hour between lectures, and a 1-hour lunch break each day.
**World Brewing Academy**

**Advanced Brewing Theory Program**

**Program Length:** 6-weeks (30-days)

**Clock Hours:** 210

**Campus:** Chicago, U.S.A.

**Graded:** Yes

**Document(s):** Certificate of Completion and Transcript of Grades

**Course Number:** W11

---

**Objectives**

The WBA Advanced Brewing Theory Program (ABT) gives students a complete understanding of the technical issues in professional brewing, whether craft or industrial. Our course materials address critical topics in brewing technology, giving students the knowledge they need to improve their products, processes and profits.

**Description**

The WBA ABT Program consists of 3 modules. Students may take any of these 2-week campus version modules as a separate unit, electing to complete the program at a later date.

**WBA Raw Materials and Wort Production Module** (Module 1)

WBA Raw Materials and Wort Production Module provides training in the technology and science of wort creation. Each critical factor in wort production, from barley growth to wort boiling and cooling, is explained in detail. Students will complete this 2-week module with a complete understanding of the effects of products and processes on this area of the brewing cycle.

**WBA Beer Production and Quality Control Module** (Module 2)

WBA Beer Production and Quality Control Module provides the technical theory from the completion of wort cooling and boiling to the evaluation of packaged beer. This module offers in-depth instruction in fermentation and maturation, including all aspects of yeast handling and performance. This module also includes instruction in the process of quality control and assurance, ensuring that students understand the critical role that QA/QC plays in retaining the consistency and longevity of beer and other malt-based fermented products.

**WBA Packaging and Process Technology Module** (Module 3)

Our WBA Packaging and Process Technology Module deals with processing and packaging of finished beer, as well as important engineering and “physical properties” issues. The packaging information includes the most recent developments in alternative materials (such as plastic bottles) and super-high-speed bottling systems. Engineering and process instruction includes topics such as properties of metals and other materials, fluid and pump dynamics, and other areas critical to improving brewery performance.

**Admission Requirements**

All students applying for a program, module or course must be at least twenty-one (21) years of age. The WBA ABT program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by:

(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online Assessment

**Tuition Fees and Charges**

Application Processing Fee (non-refundable): $1,000.00

Regular Tuition: $9,700.00

Total: $10,700.00

The tuition applies only to the 6-week continuous program.

**Module-by-Module over time option:** Those wishing to take the WBA ABT Program on a module-by-module basis over 1+ years are required to pay the individual tuition rates for each module. For assistance in calculating tuition costs, please contact the Registrar.

**Individual module tuition fee and charges**

Application Processing Fee (non-refundable): $550.00

Regular Tuition: $3,252.00

Total: $3,875.00

**Other expenses**

Living Expenses: $115.00 (hotel per day average)

Meals, City transportation, misc.: $50.00 (per day average)

**How to apply**

World Brewing Academy

Raw Materials and Wort Production Module (Module 1)

Module Length: 2-weeks (10-days)
Clock Hours: 70
Campus: Chicago, U.S.A.
Graded: Yes
Document: Transcript of Grades
Course Number: W21

Module Objectives
Raw Materials and Wort Production provides training in the technology and science of wort creation. Each critical factor in wort production, from barley growth to wort boiling and cooling, is explained in detail. Students will complete this two-week module with a complete understanding of the effects of products and processes on this area of the brewing cycle.

Topics include
- Barley Structure and Morphology
- Barley Biochemical Changes
- Evaluation for Malting
- Malting Processes
- Barley Specifications
- Specialty Malts
- Adjuncts and Cereal Cookers
- Hops History, Varieties, Aroma Evaluation
- Hops: Botany, Cultivation, Types and Forms
- Hops: Chemistry and Analysis, Storage and Stability
- Hops: Character and Advanced Products
- Hops: Craft Brewers Perspective
- Brewing Water Composition
- Water Adjustments
- Malt Handling and Milling
- Mashing
- Enzymes
- Techniques and Wort Composition
- Wort Separation (Lauter Tun and Mash Filters)
- Boiling
- Hop Addition “Hot Side”
- Clarification
- Cooling
- Aeration
- Brewing Calculations and Mixing Formula
- Lab Analysis
- Cleaning and Sanitizing
- Effluents

Admission Requirements
All students applying for a campus-based program, module or course must be at least twenty-one (21) years of age. The Master Brewer Program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by
(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online Assessment

Individual module tuition fee and charges
Application Processing Fee (non-refundable): $550.00
Regular Tuition: $3,252.00
Total: $3,875.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

### Packaging and Process Technology Module (Module 3)

**Module Length:** 2-weeks (10-days)

**Clock Hours:** 70

**Campus:** Chicago, U.S.A.

**Graded:** Yes

**Document:** Transcript of Grades

**Course Number:** W23

### Module Objectives

Our WBA Packaging and Process Technology Module deals with processing and packaging of finished beer, as well as important engineering and “physical properties” issues. The packaging information includes the most recent developments in alternative materials (such as plastic bottles) and super-high-speed bottling systems. Engineering and process instruction includes topics such as properties of metals and other materials, fluid and pump dynamics, and other areas critical to improving brewery performance.

### Topics include

- Packaging Overview
- Packaging Materials
- Packaging Line Design and Flow
- Glass Bottles and PET Technology
- Bottle Washing
- Bottle Filling/Crowning
- Principles of Canning/Seaming
- Pasteurization
- Kegging Technology (single valve keg)
- Labelling Technology
- Bottle Conditioning
- Principles of Maintenance Effectiveness
- Brewery Design
- Fluid Flow Fundamentals
- Gases in the Brewery
- Valves in the Brewery
- Pumps in a Brewery (and Troubleshooting)

### Admission Requirements

All students applying for a campus-based program, module or course must be at least twenty-one (21) years of age. The Master Brewer Program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by

(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online Assessment

World Brewing Academy

Business of Brewing and Technical Case Studies Module (Module 4)

Module Length: 1-week (5-days)
Clock Hours: 35
Campus: Munich - Fall 2020 and Spring 2021
Graded: Pass/Fail
Document: Transcript of Grades
Course Number: W24

Module Objectives
The primary purpose of this 1-week module is to expose students to the challenges of running breweries similar in scale to that of their respective employers. Students will learn the importance of planning and budgeting, both areas where they may currently, or soon, contribute. They will also learn the importance of anticipating competitive, regulatory and supply challenges, and their impact on the planning and budgeting processes as well as the overall health of the brewery.

The Technical Case Studies portion is designed to emulate the dynamics found in commercial breweries. Students become part of small work groups where they are assigned case studies based on actual problematic situations. On the final day, each group will give a presentation resolving the given case study to both a panel of professionals and to their fellow classmates.

Admission Requirements
All students applying for a campus-based program, module or course must be at least twenty-one (21) years of age. The Master Brewer Program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by

(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online Assessment

Individual module tuition fee and charges
Application Processing Fee (non-refundable): $550.00

**Applied Brewing Techniques Module**  
(Module 5)

- **Module Length:** 3-weeks (15-days)  
- **Clock Hours:** 105  
- **Campus:** Munich, GR.  
- **Graded:** Yes  
- **Document:** Transcript of Grades  
- **Course Number:** W25

**Module Objectives**
The 3-week Applied Brewing Techniques module allows students to experience hands-on commercial brewing techniques in the brewing facilities of Doemens Academy in Munich. In this information-packed module, students will perform practical operations in brewing, maturation, packaging, and laboratory environments. Extensive instruction in brewing microbiology is included in this module. Students will also be trained in both traditional and current brewing techniques, giving them a truly international perspective of beer production.

**Admission Requirements**
All students applying for a campus-based program, module or course must be at least twenty-one (21) years of age. The Master Brewer Program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by

Advanced Applied Brewing Techniques

Module (Module 7)

Module Length: 8-weeks (40-days)
Clock Hours: 280
Campus: Munich, GR.
Graded: Yes
Document: Transcript of Grades
Course Number: W45

Module Objectives

The WBA Advanced Applied Brewing Techniques module is designed to give students advanced level practical skills in every key area of commercial brewing operations. Created by the faculty of Doemens Academy and Siebel Institute, this module takes students through over 300 hours of hands-on activities in the production and lab facilities of Doemens Academy in Munich. This module will give students the practical skills they need to work effectively in breweries of practically any size or configuration, and it will provide complete understanding of the activities involved in each department of the typical commercial brewery.

Admission Requirements

All students applying for a campus-based program, module or course must be at least twenty-one (21) years of age. The WBA Master Brewer Program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by:

(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online Assessment

Individual module tuition fee and charges

Application Processing Fee (non-refundable): $2,500.00
Regular Tuition: $12,870.00
Total: $15,370.00

Other expenses

Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

International Diploma in
Brewing Technology Program

Program Length: 12-weeks (60-days)
Clock Hours: 420
Campus: Chicago, U.S.A. and Munich, GR
Graded: Yes
Documents: Certificate of Completion and Transcript of Grades
Course Number: W10

Program Objectives

The twin-campus WBA International Diploma in Brewing Technology program will prepare graduates to advance their careers through practical application of brewing. This 12-week program is comprised of segments, divided into 1-to-3-week modules, with each module specializing in a particular area of brewing technology. The content will address issues in brewing from an international perspective, providing a depth of unique to Siebel.

Program Description

The WBA International Diploma in Brewing Technology Program consists of six modules. Students may take any of these modules as a separate unit, electing to complete the program at a later date.

WBA Raw Materials and Wort Production Module (Module 1)
(Siebel Campus, Chicago, U.S.A.)
WBA Raw Materials and Wort Production Module provides training in the technology and science of wort creation. Each critical factor in wort production, from barley growth to wort boiling and cooling, is explained in detail. Students will complete this 2-week module with a complete understanding of the effects of products and processes on this area of the brewing cycle.

WBA Beer Production and Quality Control Module (Module 2)
(Siebel Campus, Chicago, U.S.A.)
WBA Beer Production and Quality Control Module provides the technical theory from the completion of wort cooling and boiling to the evaluation of packaged beer. This module offers in-depth instruction in fermentation and maturation, including all aspects of yeast handling and performance. This module also includes instruction in the process of quality control and assurance, ensuring that students understand the critical role that QA/QC plays in retaining the consistency and longevity of beer and other malt-based fermented products.

WBA Packaging and Process Technology Module (Module 3)
(Siebel Campus, Chicago, U.S.A.)
Our WBA Packaging and Process Technology Module deals with processing and packaging of finished beer, as well as important engineering and “physical properties” issues. The packaging
information includes the most recent developments in alternative materials (such as plastic bottles) and super-high-speed bottling systems. Engineering and process instruction includes topics such as properties of metals and other materials, fluid and pump dynamics, and other areas critical to improving brewery performance.

**WBA Business of Brewing and Technical Case Studies Module** (Module 4) *(Doemens Campus, Munich, GR)*

The primary purpose of this 1-week module is to expose students to the challenges of running breweries similar in scale to that of their respective employers. Students will learn the importance of planning and budgeting, both areas where they may currently, or soon, contribute. They will also learn the importance of anticipating competitive, regulatory and supply challenges, and their impact on the planning and budgeting processes as well as the overall health of the brewery.

The Technical Case Studies portion is designed to emulate the dynamics found in commercial breweries. Students become part of small work groups where they are assigned case studies based on actual problematic situations. On the final day, each group will give a presentation resolving the given case study to both a panel of professionals and to their fellow classmates.

**WBA Applied Brewing Techniques Module** (Module 5) *(Doemens Campus, Munich, GR)*

The 3-week WBA Applied Brewing Techniques Module allows students to experience hands-on commercial brewing techniques in the brewing facilities of Doemens Academy in Munich. In this information-packed module, students will perform practical operations in brewing, maturation, packaging, and laboratory environments. Extensive instruction in brewing microbiology is included in this module. Students will also be trained in both traditional and state-of-the-art brewing techniques, giving them a truly international perspective of beer production.

**WBA European Brewing Study Tour Module** (Module 6) *(Doemens Campus, Munich, GR)*

Over the span of two weeks, students will travel throughout Europe to get behind-the-scenes tours of breweries, equipment manufacturers, and product suppliers. English-language instructional sessions will be conducted throughout this program by our World Brewing Academy instructional team, preparing students to get the most out of their visits.

**Admission Requirements**

All students applying for a program, module or course must be at least twenty-one (21) years of age. The WBA International Diploma in Brewing Technology program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by:

(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online Assessment

**Tuition Fees and Charges**

Application Processing Fee (non-refundable): $2,500.00  
Regular Tuition: $15,500.00  
Total: $18,000.00

The tuition applies only to the 12-week continuous program.

**Blended-learning option:** Those wishing to take the WBA International Diploma in Brewing Technology Program as “blended-learning,” taking Modules 1-3 online (the WBA Advanced Brewing Theory program), then 4-6 in Munich, Germany, should contact the Registrar for assistance on the registration steps.

**Module-by-module over time option:** Those wishing to take the International Diploma in Brewing Technology Program on a module-by-module basis over 1+ years are required to pay the individual tuition rates for each module. Please see our website at http://www.siebelinstitute.com for individual module tuition fees and charges. For assistance in calculating tuition costs, please contact the Registrar.

Students taking the full, continuous 12-week program receive round-trip airfare (Chicago O’Hare International Airport, Chicago, U.S.A., to Munich Franz Joseph Strauss International Airport and back to Chicago) within the cost of tuition. Room and board is the responsibility of the students in both Chicago and Munich.

**Other expenses**

Living Expenses: $115.00 (hotel per day average)  
Meals, City transportation, misc.: $ 50.00 (per day average)

**How to apply**

World Brewing Academy
Master Brewer Program

Level: Advanced
Program Length: 20-weeks (100-days)
Clock Hours: 700
Campus: Chicago, U.S.A. and Munich, Germany
Documents: Certificate of Completion and Transcript of Grades
Course Number: W40

Program Objectives
The twin-campus WBA Master Brewer program will prepare graduates to advance their careers through practical application of brewing. Advanced theory and an extensive advanced practical applications module will provide graduates with the knowledge and experience to be capable of qualifying for employment in the position as a head brewer. This 20-week program is comprised of segments, divided into modules, with each module specializing in a particular area of brewing technology. The content will address issues in brewing from an international perspective, providing students with education and experience not offered by any other brewing school.

Program Description
The WBA Master Brewer Program consists of seven modules. Students may take any of these modules as a separate unit, electing to complete the program at a later date.

WBA Raw Materials and Wort Production Module (Module 1)
(Siebel Campus, Chicago, U.S.A.)
WBA Raw Materials and Wort Production Module provides training in the technology and science of wort creation. Each critical factor in wort production, from barley growth to wort boiling and cooling, is explained in detail. Students will complete this 2-week module with a complete understanding of the effects of products and processes on this area of the brewing cycle.

WBA Beer Production and Quality Control Module (Module 2)
(Siebel Campus, Chicago, U.S.A.)
WBA Beer Production and Quality Control Module provides the technical theory from the completion of wort cooling and boiling to the evaluation of packaged beer. This module offers in-depth instruction in fermentation and maturation, including all aspects of yeast handling and performance. This module also includes instruction in the process of quality control and assurance, ensuring that students understand the critical role that QA/QC plays in retaining the consistency and longevity of beer and other malt-based fermented products.

WBA Packaging and Process Technology Module (Module 3)
(Siebel Campus, Chicago, U.S.A.)
Our WBA Packaging and Process Technology Module deals with processing and packaging of finished beer, as well as important engineering and “physical properties” issues. The packaging information includes the most recent developments in alternative materials (such as plastic bottles) and super-high-speed bottling systems. Engineering and process instruction includes topics such as properties of metals and other materials, fluid and pump dynamics, and other areas critical to improving brewery performance.

WBA Business of Brewing and Technical Case Studies Module (Module 4) (Doemens Campus, Munich, GR)
The primary purpose of this 1-week module is to expose students to the challenges of running breweries similar in scale to that of their respective employers. Students will learn the importance of planning and budgeting, both areas where they may currently, or soon, contribute. They will also learn the importance of anticipating competitive, regulatory and supply challenges, and their impact on the planning and budgeting processes as well as the overall health of the brewery.

The Technical Case Studies portion is designed to emulate the dynamics found in commercial breweries. Students become part of small work groups where they are assigned case studies based on actual problematic situations. On the final day, each group will give a presentation resolving the given case study to both a panel of professionals and to their fellow classmates.

WBA Advanced Applied Brewing Techniques Module (Module 5)
(Doemens Campus, Munich, GR)
The 3-week WBA Advanced Applied Brewing Techniques Module allows students to experience hands-on commercial brewing techniques in the brewing facilities of Doemens Academy in Munich. In this information-packed module, students will perform practical operations in brewing, maturation, packaging, and laboratory environments. Extensive instruction in brewing microbiology is included in this module. Students will also be trained in both traditional and current brewing techniques, giving them a truly international perspective of beer production.

WBA European Brewing Study Tour Module (Module 6)
(Doemens Campus, Munich, GR)
Over the span of two weeks, students will travel throughout Europe to get behind-the-scenes tours of breweries, equipment manufacturers, and product suppliers. English-language instructional sessions will be conducted throughout this program by our World Brewing Academy instructional team, preparing students to get the most out of their visits.

WBA Advanced Applied Brewing Techniques Module (Module 7)
(Doemens Campus, Munich, GR)
The WBA Advanced Applied Brewing Techniques Module is designed to give students advanced level practical skills in every key area of commercial brewing operations. Created by the faculty of Doemens Academy and Siebel Institute, this module takes students through over 300 hours of hands-on activities in the production and
lab facilities of Doemens Academy in Munich. This module will give students the practical skills they need to work effectively in breweries of practically any size or configuration, and it will provide complete understanding of the activities involved in each department of the typical commercial brewery.

Admission Requirements
All students applying for a campus-based program, module or course must be at least twenty-one (21) years of age. The Master Brewer Program requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by

(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online Assessment

Tuition Fees and Charges
Application Processing Fee (non-refundable): $2,500.00
Regular Tuition: $25,480.00
Total: $27,980.00

The tuition applies only to the 20-week continuous program.

Blended-learning option: Those wishing to take the WBA Master Brewer Program as “blended-learning,” taking Modules 1-3 online (the WBA Advanced Brewing Theory program), then 4-7 in Munich, Germany, should contact the Registrar for assistance on the registration steps.

Module-by-Module over time option: Those wishing to take the WBA Master Brewer Program on a module-by-module basis over 1+ years are required to pay the individual tuition rates for each module. Please see our website at http://www.siebelinstitute.com for individual module tuition fees and charges. For assistance in calculating tuition costs, please contact the Registrar.

Students taking the full, continuous 20-week program receive round-trip airfare (Chicago O’Hare International Airport, Chicago, U.S.A., to Munich Franz Joseph Strauss International Airport and back to Chicago) within the cost of tuition. Room and board is the responsibility of the students in both Chicago and Munich.

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Intermediate Level Studies
Campus

World Brewing Academy
Concise Course in Brewing Technology

Course Length: 2-weeks (10-days)
Clock Hours: 70
Campus: Chicago, U.S.A.
Graded: Yes
Documents: Certificate of Completion and Transcript of Grades
Course Number: W30

Course Objectives
The 2-week WBA Concise Course in Brewing Technology will provide students with comprehensive knowledge of the brewing process, the dynamics of brewery operations, and issues affecting the industry. Within the short time span of this course, students will gain a level of industry knowledge that will benefit them in any area of responsibility in the brewery, covering every topic critical to successful brewery operations, no matter of what size.

Course Description
The WBA Concise Course in Brewing Technology covers a similar range of topics to those presented in our advanced-level programs but at a depth that allows those with only moderate understanding of brewing science and technology to participate in the course. This is an ideal course for those considering entry into the brewing industry, as well as those pursuing wider knowledge of the business in order to improve their skills and advance in their brewing careers. The course also offers the best way to prepare for our advanced-level programs should you decide to take them at a later date.

Topics include
- Brewing Process Overview
- Basic Brewing Chemistry
- Brewing Water
- Introduction to Hops
- Introduction to Sensory
- Barley - Malting
- Malt Analysis
- Specialty Malts
- Adjuncts
- Milling
- Mashing
- Wort Separation
- Wort Boiling
- Wort Clarification/Cooling and Aeration
- Recipe Formulation
Admission Requirements
All students applying for a program, module or course must be at least twenty-one (21) years of age.

Prior knowledge of brewing process basics through either home brewing (1-year) OR having previously completed the WBA Executive Overview of the Brewing Process is required.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $550.00
Regular Tuition: $3,325.00
Total: $3,875.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Brewing Microbiology Course
Course Length: 2-weeks* (9-days)
Campus: Montréal, Canada
Graded: No
Document: Certificate of Attendance
Course Number: S10

Course Description
The Siebel Institute Brewing Microbiology course is designed to provide the theoretical knowledge and practical skills required to implement an effective microbiological quality control / quality assurance program. The course will acquaint the student with the appropriate methods for biological and sanitary control within the brewery, and will promote an understanding of the essential modern-day tools for effective microbiological evaluation of process and product.

A study of the microorganisms that are likely to occur during the various stages of the brewing process will be conducted and laboratory exercises will provide opportunities to acquire skills in microbiology and microscopy in order to identify microorganisms as well as to demonstrate some of the latest developments in brewing microbiology.

Conducted at our Siebel Institute Microbiological Services division in Montreal, Quebec, Canada, and located at the National Research Council Biotechnology Research Institute, is one of the world’s leading yeast and genetic research facilities. Students will be surrounded by research professionals using state-of-the-art equipment, creating an environment that is unique to brewing education. When not on campus, students will be able to enjoy the beauty and history of Montreal, one of the world’s most scenic and vibrant cities.

Topics include
- The Nature of Yeast
- Pure Yeast Cultures: Maintenance and Selection
- Yeast Viability: Cell Concentration, Pitching, Measurement
- Yeast Handling Practices
- Microbiology of Grains and Water
- Wild Yeast and Yeast Mutants
- Wort Spoilage Bacteria
- Beer Spoilage Bacteria
- Identification of Contaminants
- Bacterial and Wild Yeast Detection
- Yeast Growth and Fermentation
- Beer Hazes and Sediments
- Microbiology Program for Breweries
- Sterile Membrane Filtration
- General Brewery Cleaning and CIP
- Flavor Production
Intermediate Level Studies
Online

Our Online Web-based Training (WBT) system uses internet-based technologies to create an effective learning platform that works to ensure maximum student comprehension of educational content.

With standard distance learning programs, a student’s progress is intermittently monitored by support staff. Our web-based program allows student online activity to be actively monitored by facilitators allowing them to directly consult with the student as required. If a student is having difficulty understanding a brewing concept, instructors work with the student to help them gain full comprehension of the topic. It is called a “learner-centered approach” because it focuses on each learner developing a full understanding of the educational materials.

Great Content with Excellent Support
Our WBA web-based content was created by the instructional staff of Siebel Institute in Chicago, U.S.A., and Doemens Academy in Munich, Germany.

Our web-based training utilizes a mix of textual instructions, streaming video presentations narrated by some of the best instructors in brewing, and synchronous chat sessions between students and mentors. Navigation is easy and intuitive, allowing you to track the lessons you have completed and move readily backwards and forwards through reference materials. We offer complete technical support for our learning platform to make sure your web-based experience runs problem-free. Technical requirements are simple: a basic computer with internet access featuring a current web browser such as Explorer or Firefox.

Bringing the Education to You
Our web-based training saves you the cost and time of travel away from home while bringing you the same quality of education offered in our campus-based programs and courses. Students participating in our web-based programs and courses should expect to spend several hours per week both in study and in round-table sessions with fellow students and instructors.
New Offering!

World Brewing Academy

Fundamentals of Brewing Technology Course

Course Length: 5-weeks Online Access (beginning immediately upon payment)
Clock Hours: 29
Graded: No
Document(s): Certificate of Accomplishment
Course Number: WT3

Course Objectives
The online WBA Fundamentals of Brewing Technology Course will provide students with the primary foundations of the brewing process at an intermediate level. Within a very short timeframe, students will gain a level of brewing knowledge that will benefit them immediately.

Course Description
The online WBA Fundamentals of Brewing Technology course is a newly created offering, targeting only the core topics from our more thorough WBA Concise Course in Brewing Technology. The subject matter was carefully selected based on what is considered to be essential brewing knowledge, important to both professional and experienced homebrewers alike. The concept was born out of an increasing demand for a shorter intermediate-level educational offering for those with very limited time and finances. Also of importance is if in the future a student would like to take the full WBA Concise Course in Brewing Technology, the tuition paid for the WBA Fundamentals of Brewing Technology will be applied towards a tuition reduction for the WBA Concise Course in Brewing Technology, taken either online or campus.

Topics include
- Brewing Process Overview
- Basic Brewing Chemistry
- Brewing Water
- Introduction to Hops
- Barley - Malting
- Specialty Malts
- Milling
- Mashing
- Wort Separation
- Wort Boiling
- Wort Clarification/Cooling and Aeration
- Nature of Yeast
- Yeast Growth and Propagation
- Yeast Management
- Fermentation, Maturation, and High Gravity Brewing
- Fermentation Flavors

Admission Requirements
All students applying for this web-based course must be of legal drinking age in the country residing in. Prior knowledge of brewing process basics through either home brewing (1-year) OR having previously completed the WBA Executive Overview of the Brewing Process is recommended.

Tuition Fees and Charges
Regular Tuition: $1,496.00
Total: $1496.00

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

World Brewing Academy

Concise Course in Brewing Technology

Course Length: 3-months Online Access
Clock Hours: 70
Graded: Yes
Document(s): Certificate of Completion and Transcript of Grades
Course Number: WT1

Course Objectives
The Web-based WBA Concise Course in Brewing Technology will provide students with comprehensive knowledge of the brewing process, the dynamics of brewery operations, and issues affecting the industry. Within the span of this course, students will gain a level of industry knowledge that will benefit them in any area of responsibility in the brewery, covering every topic critical to successful brewery operations, no matter of what size.

Course Description
Extensive use of electronic media and instructor-mediated discussion allows students to understand the most advanced topics, no matter their level of previous technical experience. The Web-based WBA Concise Course in Brewing Technology covers a similar range of topics to those presented in our advanced-level programs but at a depth that allows those with only moderate understanding of brewing science and technology to participate in the course. This is an ideal course for those considering entry into the brewing industry, as well as those pursuing wider knowledge of the business in order to improve their skills and advance in their brewing careers, and also
offers the best way to pre- pare for our advanced-level programs should you decide to take them at a later date.

Throughout the duration of this course, students are supervised by the instructional staff of the World Brewing Academy, and actively monitored throughout the program. Students can also access instructors via email and chat sessions throughout the duration of the module. The average time spent studying is normally 7-10 hours per week but depends on the individual as well.

Topics include
- Brewing Process Overview
- Basic Brewing Chemistry
- Brewing Water
- Introduction to Hops
- Introduction to Sensory
- Barley - Malting
- Malt Analysis
- Specialty Malts
- Adjuncts
- Milling
- Mashing
- Wort Separation
- Wort Boiling
- Wort Clarification/Cooling and Aeration
- Recipe Formulation
- Brewing Calculations/Mixing Formula
- Nature of Yeast
- Yeast Growth and Propagation
- Yeast Management
- Fermentation, Maturation, and High Gravity Brewing
- Fermentation Flavors
- Filtration and Centrifugation
- Kegging and Dispense
- Keg Cleaning and Filling
- Brewery Hazards
- Introduction to Beer Styles
- Brewery Contaminants
- Cleaning and Sanitizing, Brewery CIP
- Beer Stability
- Valve Applications
- Pumps in the Brewery
- Packaging Processes

Admission Requirements
All students applying for an online program, module or course must have proof to be of legal drinking age in their country of residence in order to be approved and admitted by submitting a copy of their passport, residence permit or driver's license.

Prior knowledge of brewing process basics through either home brewing (1 year) OR having previously earned a Certificate of Attendance for the WBA Executive Overview of the Brewing Process (online) is required. Student performance for the latter is subject to review.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $550.00
Regular Tuition: $3,252.00
Total: $3,875.00

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com
Advanced Level Studies
Online

World Brewing Academy
Advanced Brewing Theory Program

Program Length: 9-months online access
Clock Hours: 210
Graded: Yes
Documents: Certificate of Completion and Transcript of Grades
Course Number: WT2

Program Objectives
To give students a complete understanding of the technical issues in professional brewing, whether craft or industrial, without having to travel. Our course materials address critical topics in brewing technology, giving students the knowledge needed to improve their products, processes and profits.

Program Description
The Web-based WBA Advanced Brewing Theory (ABT) Program consists of 3 modules. Students may take any of these 3-month modules as a separate unit, electing to complete the program at a later date.

Throughout the duration of this intensive program, students are supervised by the instructional staff of the World Brewing Academy, drawing on the talents of some of the most knowledgeable scientists, technologists and brewmasters in the industry. Student progress is actively monitored throughout the program, and students can access instructors via email and chat sessions throughout the duration of the module. The average time spent studying is normally 7-10 hours per week but depends on the individual as well.

WBA Raw Materials and Wort Production Module (Module 1) (3 months of online access)
Raw Materials and Wort Production provides training in the technology and science of wort creation. Each critical factor in wort production, from barley growth to wort boiling and cooling, is explained in detail. Students will complete this two-week module with a complete understanding of the effects of products and processes on this area of the brewing cycle.

WBA Beer Production and Quality Control Module (Module 2) (3 months of online access)
Beer Production and Quality Control picks up from the Raw Materials and Wort Production module to provide training in technologies from the completion of wort cooling and boiling to the evaluation of packaged beer. This module offers in-depth instruction in fermentation and maturation, including all aspects of yeast handling and performance. This module also includes instruction in the process of quality control and assurance, ensuring that students understand the critical role that QA/QC plays in retaining the consistency and longevity of beer and other malt-based fermented products.

WBA Packaging and Process Technology Module (Module 3) (3 months of online access)
The Packaging and Process Technology module deals with processing and packaging of finished beer, as well as important engineering and “physical properties” issues. The packaging information includes the most recent developments in alternative materials (such as plastic bottles) and super-high-speed bottling systems. Engineering and process instruction includes topics such as properties of metals and other materials, fluid and pump dynamics, and other areas critical to improving brewery performance.

Admission Requirements
All students applying for an online program, module or course must have proof to be of legal drinking age in their country of residence in order to be approved and admitted by submitting a copy of their passport, residence permit or driver’s license.

The Web-based WBA ABT program and modules requires students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by:
(a) Successfully passing the WBA Concise Course in Brewing Technology OR
(b) Successfully passing the online assessment

Tuition Fees and Charges
Application Processing Fee (non-refundable): $1,000.00
Regular Tuition: $9,700.00
Total: $10,700.00

For assistance in calculating tuition costs, please contact the registrar.

World Brewing Academy

Raw Materials and Wort Production Module (Module 1)

Module Length: 3-months online access
Clock Hours: 70
Graded: Yes
Document: Transcript of Grades
Course Number: WT5

Module Objectives
WBA Raw Materials and Wort Production Module provides training in the technology and science of wort creation. Each critical factor in wort production, from barley growth to wort boiling and cooling, is explained in detail. Students will complete this two-week module with a complete understanding of the effects of products and processes on this area of the brewing cycle.

Topics include
- Barley Structure and Morphology
- Barley Biochemical Changes
- Evaluation for Malting
- Malting Processes
- Barley Specifications
- Specialty Malts
- Adjuncts and Cereal Cookers
- Hops History, Varieties, Aroma Evaluation
- Hops: Botany, Cultivation, Types and Forms
- Hops: Chemistry and Analysis, Storage and Stability
- Hops: Character and Advanced Products
- Hops: Craft Brewers Perspective
- Brewing Water Composition
- Water Adjustments
- Malt Handling and Milling
- Mashing
- Enzymes
- Techniques and Wort Composition
- Wort Separation (Lauter Tun and Mash Filters)
- Boiling
- Hop Addition “Hot Side”
- Clarification
- Cooling
- Aeration
- Brewing Calculations and Mixing Formula
- Lab Analysis
- Cleaning and Sanitizing
- Effluents
- Sensory Introduction

Admission Requirements
All students applying for an online program, module or course must have proof to be of legal drinking age in their country of residence in order to be approved and admitted by submitting a copy of their passport, residence permit or drivers license.

World Brewing Academy
Beer Production and Quality Control Module (Module 2)

Module Length: 3-months online access
Clock Hours: 70
Graded: Yes
Document: Transcript of Grades
Course Number: WT6

Module Objectives
WBA Beer Production and Quality Control Module provides the technical theory from the completion of wort cooling and boiling to the evaluation of packaged beer. This module offers in-depth instruction in fermentation and maturation, including all aspects of yeast handling and performance. This module also includes instruction in the process of quality control and assurance, ensuring that students understand the critical role that QA/QC plays in retaining the consistency and longevity of beer and other malt-based fermented products.
Topics Include
- Yeast Morphology
- Yeast Characteristics for Brewing
- Yeast Nutrition
- Yeast Metabolism
- Yeast Culture and Propagation
- Yeast Physical Behavior
- Dry Yeast Production
- Fermentation Operations
- Alternative Fermentation Techniques
- Flavor Compounds
- Quality Measurement
- Management (handling practices)
- Hop Addition “cold side”
- Maturation and Storage Principles
- Alternative Aging and Storage Techniques
- Centrifuges
- Processing Aids
- Filtration – Theory and Mechanisms
- Filtration- Filters and Operations
- Sterile Filtration
- Carbonation
- Introduction to Brewing Microbiology
- Beer Spoilage Potential and Brewery Contaminants
- Detection and Identification of Contaminants
- Application of Genetic Tests in Breweries
- Oxygen Control
- Colloidal Stability
- Flavor Stability
- Color
- Foam
- Gushing
- Comprehensive QA/QC Program
- Interpretation of Beer Analysis
- Brewery CIP
- Sensory Evaluation
- Types of Taste Panels

Admission Requirements
All students applying for an online program, module or course must have proof to be of legal drinking age in their country of residence in order to be approved and admitted by submitting a copy of their passport, residence permit or drivers license.

World Brewing Academy
Packaging and Process Technology Module (Module 3)
Module Length: 3-months online access
Clock Hours: 70
Graded: Yes
Document: Transcript of Grades
Course Number: WT7

Module Objectives
Our WBA Packaging and Process Technology Module deals with processing and packaging of finished beer, as well as important engineering and “physical properties” issues. The packaging information includes the most recent developments in alternative materials (such as plastic bottles) and super-high-speed bottling systems. Engineering and process instruction includes topics such as properties of metals and other materials, fluid and pump dynamics, and other areas critical to improving brewery performance.

Topics include
- Packaging Overview
- Packaging Materials
- Packaging Line Design and Flow
- Glass Bottles and PET Technology
- Bottle Washing
- Bottle Filling/Crowning
- Principles of Canning/Seaming
- Pasteurization
- Kegging Technology (single valve keg)
- Labelling Technology
- Bottle Conditioning
- Principles of Maintenance Effectiveness
Admission Requirements
All students applying for an online program, module or course must have proof to be of legal drinking age in their country of residence in order to be approved and admitted by submitting a copy of their passport, residence permit or driver's license.

The Web-based ABT program and modules require students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by:

World Brewing Academy
Specialized Lectures

Lecture Lengths: 30-90 minutes (depending on lecture)
Lecture Access Time (upon time of purchase): 10-days
Graded: No
Document: None

These online lectures cover a multitude of specific topics pertaining to all processes of beer production, from raw materials and wort production to QA/QC, brewery engineering and packaging. The uniqueness of the WBA Specialized Lectures make them perfect for those looking to increase their knowledge in a particular area of the process without the need to travel or to enroll in more involved program or course. Business owners will also benefit from the flexibility these fully narrated online lectures offer by providing education to their workforce which can now be tailored to their exact needs. Furthermore, the learner has the opportunity to contact a monitor during the access period to answer questions related to the lecture being taken.

* Denotes coming lectures (please refer to website for when available)
Hop Addition: “Hot Side”
Brewing Calculations: Mixing Formula
Recipe Formulation
Brewery Waste: Liquid and Solid Effluents
Brewhouse Cleaning and Sanitation
Brewhouse Lab Analysis*
Yeast Morphology
Yeast Characteristics for Brewing
Yeast Nutrition
Yeast Metabolism
Yeast Culture and Propagation
Yeast Physical Behavior
Yeast Derived Flavor Compounds*
Fermentation Operations
Hop Addition: “Cold Side”*
Alternative Fermentation Techniques
Yeast Quality Measurement
Yeast Management – Handling Practices
Dry Yeast Production
Maturation – Storage Principles
Alternative Aging and Storage Techniques
Processing Aids and Cellar Additions
Beer Filtration: Theory and Mechanisms
Beer Filtration: Filters and Operations
Centrifuges
Sterile Filtration*
Carbonation
Introduction to Brewing Microbiology
Beer Spoilage Potential and Brewery Contaminants
Detection and Identification of Brewery Contaminants
Brewery CIP
Oxygen Control
Colloidal Stability
Flavor Stability
Beer Chemical Analysis
Interpretation of Beer Analysis
Comprehensive QA/QC Program
Beer Foam
Color*
Gushing*
Types of Taste Panels*
Cleaning and Sanitizing
Application of Genetic Tests in the Brewery
Packaging Overview*
Draught Dispense
Cask Conditioning*
Principles of Canning
Packaging Materials*
Glass Bottle and PET Technology*
Packaging Line Design and Flow*
Maintenance Principles
Empty Bottles and Crates Inspection*
Bottle Washing*
Bottle Filling/Crowning*
Single Valve Kegs
Labeling Technology*
Pasteurization*
Brewery Design
Fluid Flow Fundamentals
Gases in a Brewery
Valves in a Brewery
Pumps in a Brewery (and Pump Troubleshooting Exercise)
Steam Fundamentals
Principles of Heat Transfer (and Basic Energy Calculations)
Glycol Cooling Fundamentals
Liquid Processing*
Principles of Refrigeration*
Compressed Air Systems*
Materials of Construction
Hygienic Design*
Introduction to PID*
Process Control and Automation
Co2 Collection Systems
Statistics
Process Troubleshooting

Admission Requirements
All students applying for an online lecture must be of legal drinking age in their country of residence.

The WBA Specialized Lectures are at an advanced level, and students should have a specific knowledge of brewing technologies and/or related sciences in order to comprehend the information.

Tuition Fees and Charges
Lecture pricing is determinant upon the length of the individual lecture. Please see our website for pricing of each individual lecture.

To apply for this course please visit our web-site at http://www.siebelinstitute.com
Entry Level Studies

Campus

Doemens Biersommelier Course

Course Length: 2-weeks (10-days)
Campus: Chicago, USA and Toronto, Canada
Graded: No
Document: Certificate of Attendance (Doemens Biersommelier Dipl)
Course Number: W55

Course Description
The Doemens Biersommelier Course has been setting the standard for beer service worldwide since 2004, and has provided instruction to thousands of servers, brewers, distributors and beer aficionados alike. The goal of this course is to impart beer knowledge on a level that in the end will enable those who finish the course to advise others on the production of beer, characteristics of certain beer styles and their history, and how to select the correct beer to pair with differing cuisines and dishes.

Topics include
- History of beer and brewing
- Raw material education (water, malt, hops)
- Sensory training and analysis
- Brewing technology
- Practical brew day
- Beer vocabulary and communication
- Introduction to beer culture
- International beer styles
- Wood and barrel aged beer
- Storage of beer
- Vintage beer
- Beer dispensing and draft systems
- New beer glass culture
- Beer and Food/Cuisine art
- Food Pairing
- Creating a menu
- The Beersommelier in the world: Trends and Prospects

Admission Requirements – Chicago, U.S.A.
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior brewing knowledge is not required, but having some beer styles knowledge and/or 1 year previous homebrewing a plus.

Admission Requirements – Toronto, Canada
All students applying for a program, module or course must be at least nineteen (19) years of age. For this course, prior brewing knowledge is not required, but having some beer styles knowledge and/or 1 year previous homebrewing a plus.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $550.00
Regular Tuition: $3970.00
Total: $4520.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Craft Distilling Operations and Technology Course

Course Length: 1-week (5-days)
Campus: Chicago, U.S.A.
Graded: No
Document(s): Certificate of Attendance
Course Number: S51

Course Description
The course is designed to give students the critical information they need to create distilled spirits in a small-scale distillation environment. Students will learn the theory behind working successfully in small distillery operations, as well as related management and logistical issues. With content created and presented by experts in the international distilling industry, this course will give you the knowledge needed to operate a distillery efficiently, safely, and profitably. You will also learn production techniques involved in distillation from grain, fruit, and other products.

Topics Include
- Materials and Processing
- Fermentation: Theory and Fundamentals
- Fermentation: Distilling Applications
- Distillation Technology: Fundamentals of Distillation
World Brewing Academy

Craft Cider Course

Course Length: 1-week (5-days)
Campus: Chicago, U.S.A.
Graded: No
Document(s): Certificate of Attendance
Course Number: W60

Course Description
Created and presented by Gerrit Blümelhuber of Doemens Academy, this 5-day course covers the history and evolution of cider and perry. There will also be an in-depth look at the differing raw ingredients and processes of producing traditional cider and perry from various regions of the world. The course also takes a deep dive into fermentation and maturation techniques, along with differing packaging and filtration options.

Topics Include
- Historical evolution of Cider
- Raw materials (apples and pears)
- Differing varieties and how to find them
- How to plan an orchard and cultivate the fruit
- Cleaning, crushing and pressing of the fruit
- Treatment of the juice
- Fermentation, Maturation and Lagering
- Cider tastings from world-wide producers
- Production process
- Filtration and filtering process
- Visit to a cidery, and much more

Admission Requirements
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior cider or brewing knowledge is not required, but students will benefit from existing knowledge of brewing technologies and/or related sciences such as fermentation.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $250.00
Regular Tuition: $2,125.00
Total: $2,375.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Essential Quality Control Course

Course Length: 3.5-days
Campus: White Labs, San Diego, CA, U.S.A.
Graded: No
Document(s): Certificate of Attendance
Course Number: S65

Course Description
This course is jointly offered by Siebel Institute and White Labs, and hosted at the White Labs facility in San Diego, California, and presents a full range of topics related to quality control (QC) that will give you the knowledge required to produce beers of high quality with consistency.
This course will cover the most important and essential aspects of an in-house QC program, including; sensory evaluation, advanced sensory analysis techniques, analytical testing, microbiological testing, bacteria detection and sampling techniques. The emphasis in this course is practical hands-on learning enhanced by lectures dealing in the sciences behind the techniques. You will learn the tools and procedures used worldwide to evaluate beer at every critical phase of production, employing standards designed and tested by organizations like the ASBC and EBC.

**Topics Include**
- Yeast Quality Measurements: Scope and Definition, Yeast Health and Quality
- How to Measure Health: Viability and Vitality
- Operations: Cropping, Storage, Pitching and Aeration
- Product Considerations
- Pure Cultures: Aims and Objectives, Methods, Maintenance
- Propagation: Why and When, Lab and plant-scale approaches, etc.

**Admission Requirements**
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior brewing knowledge is not required, but students will benefit from existing knowledge of brewing technologies and/ or related sciences.

**Tuition Fees and Charges**
Application Processing Fee (non-refundable): $250.00
Regular Tuition: $1,420.00
**Total: $1,670.00**

**Other expenses:**
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

**How to apply**
To apply for this course please visit our web-site at [http://www.siebelinstitute.com](http://www.siebelinstitute.com)

---

**Master of Beer Styles and Evaluation Course**

**Course Description**
The Master of Beer Styles and Evaluation Course is designed to give all brewers the skills they need to formulate, brew, and evaluate gold-medal beer recipes.

While students do not need a brewing background to attend this course, we ask that those attending should have a basic understanding of how beer is made in order to get the most from this course.

Those with either professional brewing experience or formal education in the equivalence of our WBA Concise Course in Brewing Technology will find this course highly valuable in formulating beer styles for competitions such as the World Beer Cup® and Great American Beer Festival®, as well as for expanding their knowledge of beer styles.

**Admission Requirements**
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior brewing knowledge is not required but recommended.

**Tuition Fees and Charges**
Application Processing Fee (non-refundable): $250.00
Regular Tuition: $1,350.00
**Total: $1,600.00**

**Other expenses**
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

**How to apply**
To apply for this course please visit our web-site at [http://www.siebelinstitute.com](http://www.siebelinstitute.com)
Sensory Panel Management Course

Course Length: 3.5-days
Campus: Chicago, U.S.A.
Graded: No
Document(s): Certificate of Attendance
Course Number: S33

Course Description
The first line of quality control and product evaluation in any brewery is formed by a trained taste panel. By effectively utilizing taste panels appropriately and analyzing and acting on results compiled from trained tasters, your brewery can improve quality, consistency and profitability.

With instruction given by brewing industry sensory panel experts, this course will instruct you in the tools and techniques used by many of today’s leading breweries to assess and analyze data to ensure their beer is of the best quality and meets their target parameters. This course is critical for packaging breweries of every size – from craft to commercial - and may also benefit brewing guilds looking to form member taste panels towards evaluating and improving the quality of beers produced by their members.

Topics include
- Definition of Panel, Panel Leader and Sensory Evaluation
- Basic Sensory Physiology: Human Flavor Perception
- Non-Physiological Influences on Flavor Perception
- Personnel, facilities, resources required, etc.
- Establishing Panels for Breweries of Any Size
- Motivations, Rewards, Validation and Retention
- Running a Panel and Training the Trainer
- Difference and Descriptive Tests
- Significance and Analysis

Admission Requirements
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior brewing knowledge is not required, but students will benefit from existing knowledge of brewing technologies and/or related sciences.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $250.00
Regular Tuition: $1,655.00
Total: $1,905.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, city transportation, misc.: $50.00 (per day average)

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Start Your Own Brewery Course

Course Length: 3-days
Campus: Chicago, U.S.A.
Graded: No
Document(s): Certificate of Attendance
Course Number: S80

Course Description
Designing, building and operating a successful brewery requires a mix of business and brewing knowledge. This 3-day course covers the planning and startup aspects everyone needs to understand, presenting issues a prospective brewery owner should know to help build a successful business from the ground up, while avoiding common pitfalls and mistakes which can compromise the efficiency and profitability of the business. Designed and conducted by Ray Daniels, along with Siebel Institute faculty and specialists in brewery and brewpub operations and business planning, the course addresses brewery and pub management issues, and successful brewery and pub entrepreneurs will share their stories and experiences and answer class questions.

Topics include
- Anatomy of a brewery
- Buying brewing equipment and figuring production capacity
- Site selection and practical considerations
- Utilities, waste water and regulations
- Packaging design and point-of-sale (POS) materials
- Finding and working with a distributor
- Franchise laws, and more...

Admission Requirements
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior brewing knowledge is not required as this is not a brewing course.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $250.00
Regular Tuition: $1,215.00
Total: $1,465.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, city transportation, misc.: $50.00 (per day average)

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Draught Executive Course

Course Length: 2-days
Campus: TBD, U.S.A.
Graded: No
Document(s): Certificate of Attendance
Course Number: S56

Course Description
This course acts as an introduction to the “Art and Science” of draught beer dispense, and makes up the first 2-days of the Draught Master Course. Perfect for bartenders, bar managers and distributors who must understand the basics of draught management, and features basic content and instruction for both novice and experienced draught personnel, but at a more “executive-style” mix of technical theory and “hands-on” practical.

Topics include
- Basic dispense systems
- Keg quality assurance
- Taps and faucets, shanks and towers
- Carbonation principles, along with gases and regulators
- Ideal serving temperatures and Co2 pressure
- “Perfect pour, perfect taste”
- Glassware, styles and cleaning and care of
- Cooling systems (forced air to glycol)
- Beer Pumps and dispense systems
- Troubleshooting

Admission Requirements
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior brewing knowledge is not required.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $100.00
Regular Tuition: $915.00
Total: $1,015.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Draught Master Course

Course Length: 4-days
Campus: TBD, U.S.A.
Graded: No
Document: Certificate of Attendance
Course Number: S55

Course Description
Master the “Art and Science” of draught beer dispense with the Siebel Draught Master Course. This 4-day course features industry-leading basic and advanced content and instruction for both the novice and the experienced draught personnel.

Offering a mix of technical theory along with “hands-on” practical in facilities dedicated specifically to draught training, this course is perfect for brewers, draught quality specialists, installation and service technicians, manufacturers and suppliers, as well as bar managers and staff will all find this course extremely useful.

Topics include
- Beer pumps and FOBS
- Sensory evaluation skills
- Walk-in Cooler design
- Serving and foam issues
- Glycol cooling systems design and install
- Bright tank and cask ale dispense
- And much more…

Admission Requirements
All students applying for a program, module or course must be at least twenty-one (21) years of age. For this course, prior brewing knowledge is not required.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $250.00
Regular Tuition: $1,410.00
Total: $1,660.00

Other expenses
Living Expenses: $115.00 (hotel per day average)
Meals, City transportation, misc.: $50.00 (per day average)

To apply for this course please visit our web-site at http://www.siebelinstitute.com
Entry Level Studies
Online

World Brewing Academy
Executive Overview of the Brewing Process Course

Course Length: 3-weeks Online Access
Graded: No
Document: Certificate of Attendance
Course Number: WT4

Course Description
Brewing industry executives and those considering entering the industry need to know the ins-and-outs of professional brewery operations in order to make effective financial and managerial decisions. The World Brewing Academy (WBA) introduces a way to learn the basics of brewery dynamics without the need to travel.

This course allows executives, administrative staff, and brewing-industry decision makers around the globe to participate in professional-level English-language training over the Internet. Participants study as their schedule permits, and can utilize the resources of their own brewery (if applicable) for practical application of their course materials. The average time per student spent studying is 5-hours or less per week.

The WBA Executive Overview of the Brewing Process offers an extensive range of topics covering each critical area of brewing technology.

Topics include
- Brewing Process Overview
- Malting, adjuncts and other malts
- Brewing Water
- Brewer’s Yeast
- Hops
- Milling
- Mashing and Wort Separation
- Wort Boiling, Whirlpool, Wort Cooling and Aeration
- Fermentation
- Maturation, Storage, Carbonation and Filtration
- Packaging, Warehousing
- Cleaning and Sanitizing
- Beer Dispense and Serving
- Biological Control
- Quality Issues
- Beer Styles

Admission Requirements
All students applying for an online program, module or course must have proof to be of legal drinking age in their country of residence in order to be approved and admitted by submitting a copy of their passport, residence permit or drivers license. For this course, prior brewing knowledge is not required.

Tuition Fees and Charges
Application Processing Fee (non-refundable): $100.00
Regular Tuition: $885.00
Total: $985.00

How to apply
To apply for this course please visit our web-site at http://www.siebelinstitute.com

Policies and Procedures

Approval
Siebel Institute of Technology is approved by the Division of Private Business and Vocational Schools of the Illinois Board of Higher Education.

Accreditation
Siebel Institute of Technology is not accredited by an accrediting body recognized by the U.S. Department of Education. The school does not guarantee the transferability of credits to another school, college or university. Credits or coursework are not likely to transfer; any decision on the comparability, appropriateness and applicability of credit and whether credit should be accepted is the decision of the receiving institution.

Admission
It is the policy of Siebel Institute to admit students without regard to race, gender, sexual orientation, religion, creed, color, national origin, ancestry, marital status, age, disability, or any other factor prohibited by law.

All students applying for a campus program, module or course must be at least twenty-one (21) years of age.

Advanced level programs require students to have a specific knowledge of brewing technologies and/or related sciences in order to be approved to enroll. This can be satisfied by (a) Successful completion of the WBA Concise Course in Brewing Technology OR (b) Successful completion of an online assessment

Cancellation of Enrollment Agreement Prior to Start of Class
The student may cancel the enrollment agreement by delivering written notice of such cancellation to the Siebel Institute registrar prior to 5pm on the 5th business day after the student has entered into the enrollment agreement to receive a full refund of all monies paid to Siebel Institute, provided that classes have not yet started during such period. Cancellations received after the 5th business day and prior to the first day of class will lead to a full tuition refund less the Application Processing Fee (APF). If the application is not accepted by Siebel Institute all monies paid to Siebel Institute relating to the application, including the APF, will be refunded to the student. All course cancellations must be made in writing to the Registrar at Siebel Institute of Technology, 322 South Green Street, Suite 100, Chicago, Illinois, 60607, OR by submitting a cancellation request thru our website.

Cancellation after the Start of Class: Campus Courses
A student may withdraw from a course, module or program at any time, and partial tuition refunds, if any, will be given based on the number of calendar days that have elapsed since the first day of such course, module or program as set forth on the following schedule.

<table>
<thead>
<tr>

</tbody>
</table>

*Starting on the first day class is scheduled to meet up until and including the date written cancellation is received by the Siebel Institute Registrar

Online Courses:
A student may withdraw from an online course, module or program at any time, and partial tuition refunds, if any, will be given based on the percentage of completion as set forth on the schedule below.

Refund Schedule (Online Courses)

<table>
<thead>
<tr>
<th>Percentage completed*</th>

</tr>
</tbody>
</table>

*Determined on the date written cancellation is received by the Siebel Institute Registrar

Active military or reservist students called to duty or training:
A student who is on active duty or is a military reservist (including members of the National Guard) may withdraw from Siebel Institute and receive a full tuition refund if such student is called for active duty or reassignment during the course/program, provided that the student officially withdraws and submits a copy of his/her Official Orders to the registrar at Siebel Institute. Following withdrawal, the student will be dropped from all registered courses, modules and programs, and no certificate or diploma may be earned for any programs/courses for which a refund has been given.

Cancellation of Course
Siebel Institute reserves the right to cancel any course for any reason at any time. All monies paid to Siebel Institute, including the APF, for any cancelled course will be refunded within thirty (30) business days of any such cancellation.
Financial Aid
Siebel Institute of Technology is a privately-owned, vocational trade school, and therefore does not qualify for Federal student loans, grants, or GI Bill. Siebel Institute is recognized by the Veterans Administration’s Vocational Rehabilitation program.

Grading Information
Advanced and Intermediate-level programs, modules and courses within the “Certificate Studies” category is graded as follows:

<table>
<thead>
<tr>
<th>Points</th>

<td>Unsatisfactory</td>
</tr>
</tbody>
</table>

Grievance
Siebel Institute endeavors to treat all student complaints fairly and to address student concerns promptly. Students are directed to submit all complaints in a dated, signed writing to the Office Manager of Siebel Institute. Siebel Institute endeavors to address, and where practicable, respond to complaints within five (5) business days. If Siebel Institute deems necessary, a written response may be presented to the student. Records will be maintained in respective student files and treated as confidential.

Complaints against the school may be registered with the Board of Higher Education online at http://complaints.ibhe.org

Illinois Board of Higher Education
Division of Private Business and Vocational Schools
1 N. Old State Capitol Plaza, Suite 333
Springfield, Illinois 62701-1377
Phone: 217-782-2551
Fax Number: 217-782-8548
www.ibhe.org

Payment Terms: Campus Courses
To reserve a seat in any course, module or program, the required non-refundable Application Processing Fee (APF) must be paid within five (5) days after a student is accepted. To qualify for “Regular Tuition” pricing, full payment must be received no later than sixty (60) days in advance of the course, module or program start date. “Late Tuition” pricing will apply after this time. If a student application is received less than forty-five (45) days in advance of the course, module or program start date, full payment including the APF is required upon approval of attendance.

Payment Terms: Online (Web-based) Courses
To reserve a seat in any online course, module or program, the required non-refundable APF must be paid within five (5) days after a student is accepted. To qualify for “Regular Tuition” pricing, full payment must be received no later than fourteen (14) days in advance of the course, module or program start date. “Late Tuition” pricing will apply after this time. If a student application is received less than fourteen (14) days in advance of the course, module or program start date, full payment, including the APF is required upon approval of attendance.

Payment
Payments are accepted through Visa, MasterCard, Wire Transfer, checks drawn on a US bank and US money orders. Siebel Institute is not responsible for any transaction fees. If submitting payment by Wire Transfer, contact the registrar for banking information. Allocate sufficient time to process the Wire Transfer payments. It is the student’s responsibility to ensure that their account is in order.

Privacy
Siebel Institute respects your privacy and will not provide any personal information to other parties without your written consent.

Termination
Siebel Institute reserves the right to cancel the enrollment agreement for any of the following reasons:
(a) failure to maintain satisfactory academic progress
(b) failure to pay school fees and/or tuition by applicable due dates
(c) disruptive behavior
(d) posing a danger to the health or welfare of students or other members of the Siebel Institute community
(e) failure to comply with the policies and procedures of Siebel Institute.

Disclaimer
The information in this document was the best available at the time of release. Siebel Institute endeavors to present an accurate view of the policies, programs, facilities, fees, and personnel of the school in this document. This catalog is updated regularly and available for download from the Siebel Institute website at www.siebelinstitute.com/downloads/siebel-academic-catalog/

Important notice to currently enrolled students
The policies and procedures set forth in this copy of the Siebel Institute Academic Catalog become effective as of 1 July 2020 and may not necessarily apply to currently enrolled students.

Please refer to your signed enrollment agreement for policies and procedures applicable at the time your application was approved for attendance.
